PROJECT

DATABASE SYSTEM: "CCIS Property Item Inventory System" (Collaborated with Ms. Am Arryl Share I. Abellana & Mr. Ronymar A. Tejano)

The system is designed to manage and oversee the inventory of property items, tracking details such as condition, purchase history, and disposal records. The report outlines the challenges faced with the manual inventory process and how the introduction of a database system provided a solution by improving efficiency, data retrieval, and decision-making.
